## Announcement of establishment of a new production base

We would like to inform you that we, Asahi Yukizai Corporation, passed the resolution to establish a new production base in Nobeoka City, Miyazaki Prefecture as mentioned below, at the meeting of the Board of Directors held on December 24, 2025.

### 1. Background

In our medium-term management plan entitled “GNT2025,” we at Asahi Yukizai place our management policy of pursuit of growth centering at overseas and semiconductor-related markets. As part of such endeavors, aiming at strengthening the competitiveness in the valve & piping systems business, we have been studying the development of our Nobeoka Factory into next-generation facility.

In order to keep pace with the expanding market for semiconductor-manufacturing equipment backed by increasing demand for AI products, we have recently decided to purchase a factory located in Nobeoka City, Miyazaki Prefecture, from Asahi Kasei Microdevices Corporation and develop it into our new production base. It is expected that this will result in an approximately three-fold increase in production capacity. It is our intention that we will continue meeting flexibly customers’ needs and be positive in further expanding the business and increasing the corporate value.

### 2. Outline of the new basis

Location	Nakagawara-machi, Nobeoka City, Miyazaki Prefecture
Major articles produced	Small-sized, precision valves for semiconductor-manufacturing equipment (Dymatrix™) and flow-controlling equipment (FALCONICS™)
Production capacity	Approximately three times greater than at present
Amount of investment	17.5 billion yen

### 3. Schedule

Starting construction	Expected in December 2026
Construction completion	Expected in October 2028

### 4. Outlook for the future

The construction of the factory will have no effect on the business results of the current fiscal year. When, in the future, matters to be disclosed arise, we will promptly inform you of those.
