

## Aichi Plant Renovation : Phenolic Resin Production Starts in August 2012

August 27, 2012

Asahi Organic Chemicals Industry Co., Ltd.

The renovation of Aichi plant for the manufacture of phenolic resin for castings, completed in July, 2012 and has started operation in August, 2012. In this plant, while keeping the same production capacity, the automation of the manufacturing process was attained to produce high quality products with high production efficiency. The facility is also designed to curb the emission of greenhouse gasses such as carbon dioxide, to contribute to environmental safeguards.

Asahi Organic Chemicals will continue to pursue further reinforcement in its leading position further in this field.

### Outline of the facility

Location: 26-4, Shinzu Minamiyana, Fuso-Cho, Niwa-Gun, Aichi-Pref, Japan 480-0105

Products: phenolic resin for castings

Expenditure: 1.5 Billion Yen

Start-up: August 2012
